Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Scott (US. 5,669,412).

Scott discloses a ring seal assembly having a rubber ring seal (e.g. 212) having a periphery (e.g. periphery of 212), a carrying frame (e.g. 214) extending about the periphery of the ring seal and including a plurality of mounting lugs (e.g. lugs shown in cross-section figure 8) extending from the carrying frame into the ring seal and being separable (the ring seal and the carrying frame is separable) from the carrying frame so that the carrying frame can be selectively detachable from the ring seal (the carrying frame is capable of selectively being detached). The carrying frame is made of re-usable plastics or metal material (e.g. the ring seal is made of rubber and the carrying frame is made of plastic or metal material, column 2, lines 30-32). The carrying frame is disposable (all members are capable of being disposed). The carrying frame is fabricated of a material selected from the group consisting of: wire, plastic or cardboard. The ring seal is molded (method limitation given little patentable weight in an apparatus claim) about the mounting lugs. The carrying frame is fabricated from a material different than that used to make the ring seal.
